

Privacy has long been regarded as something people require in varying degrees

1. Social networks like facebook and second life are
 - A fun way of staying in touch with friends and a rich resource for organisations
 - Develop an argument and a prototype application to
 - Support privacy and also
 - Support organisations' marketing and user profiling practices
2. What about privacy in the semantic web?
 - Develop an argument and a prototype
4. Privacy and intelligent agents
 - Argue for and prototype an intelligent agent to support privacy
